BRITAIN IS AROUSED

Will Raise the Largest Army in the World to Crush Rebellions.

Trouble in China is Also Feared—Talk of Kitchener's Being Removed to India.

THE BUIERS MUST BE CRUSHED

London, March 20.—There is a particular interest in military circles over the Chinese rebellion. A condition has arisen with which the cabinet is unable to cope at present. That condition is an army to be used in case of emergency. All the available men are now in South Africa, and how to procure battalions in case the situation in China should become grave is the disturbing problem.

Since Secretary of War Hordkirk announced in the commons his plan for reorganization of the forces nothing has been done; in fact, inactivity has so seized upon these matters that conditions bordering upon chaos exist. The heavy work in the remounts against conscription of the ministry for the remount and other war scandals has so stiffened the government and its followers that they will take their good time in the matter of effecting reforms or in making provisions for future contingencies.

But it is evident the gravity of the Chinese situation has been realized by Premier Salisbury. He had a short conference today with King Edward before the departure of His Majesty for Knysna, the seat of the Earl of Derby, and it is believed that the Chinese situation was referred to at the conference.

In China nothing is discussed but the army situation, and the urgent need of building up the depleted regiments. The latest project, which a special committee of the war and colonial offices is considering, provides for a new establishment which will appeal the tax-payers. More than that, it creates the largest army in the world and in time probably the most efficient. According to the plans formulated Great Britain and Ireland will produce and equip six army corps, three of which representing, with a cavalry brigade, a force of 150,000 will be prepared to take the field in defense of the colonies or against any European power. This will leave a home defense force of similar number, besides large bodies of militia, yeomanry and volunteers. India is to provide an army corps from each of the three presidencies, and South Africa is expected to raise two army corps to be available for service anywhere. To Canada is apportioned four military corps which can be wholly used if required, while Australia is expected to raise two and New Zealand one army corps.

THE BOOY THROWN INTO THE RIVER

Pulton, Ky., March 20.—News of a terrible tragedy at Madrid Bend, Ky., below Hickman, reached the city last evening, and reveals a terrible state of affairs, which will be thoroughly investigated. According to reports, one of two negroes murdered had stolen chickens, which provoked the wrath of the white men living thereabout, and resulted in one negro being killed and three untitled.

Only one of the negroes' names could be learned, that of Eliza Drake. It is claimed that Morgan Hall, a white man, made Drake walk out into the Mississippi river, and then shot him dead and let his body drift down stream. The body washed ashore, the water being shallow, and Hall made another negro tie a rope around Drake's neck and pull him out into the current, in the middle of the river. The name of the other negro who was killed could not be learned.

floury Smith, another negro, was cruelly lashed with a whip and club and is seriously hurt. An unknown negro was shot twice by Albert Davis, and away die. Several other crimes are reported to have occurred here. It is also alleged that parties ran wild in the night, and selling whiskey without license.

Sheriff Carpenter will go out to the bend and investigate the trouble, and do all in his power to bring the criminals to the law.

The governor will be asked to offer a reward for the uncaptured and put an end to all the outlawry committed there.

Madrid Bend is a small point in Kentucky about forty miles below Hickman, with practically no government, and is near Horse, Tenn. There are a large number of splendid people who live in the place, and a large number of people who do not regard the law at all.

ONE NEW STATE LAW

People Outside the State no Longer Garnishee Debtors.

A Bad Custom Will Be Signally Broken Up By The New Measure

IT HAS HAD A BALEFUL EFFECT

One of the bills passed by the legislature will have an important effect. Outsiders who have been in the habit of abusing the Kentucky statutes and using the Kentucky courts to collect debts incurred outside the state by non-residents will find themselves in hard luck, now that the new garnishment bill has been signed by the governor. The author of the bill, Mr. W. T. Newman, of the Monon, Louisville, wanted it to be understood that his measure was not for the benefit of any one company more than of any other company doing business both inside and outside Kentucky. Under the old statute a man living in Indiana, employed by a company in Indiana, and paid in Indiana, could be garnisheed in Kentucky if the company for which he worked happened to do business in the state. The Kentucky courts for some time have been burdened with lawsuits and garnishments of wages earned outside the state, payable outside of the state and where the debtor and creditor both live outside the state. And yet because of the old statute the Kentucky courts were burdened with such suits. At the present time one corporation alone has 170 of these on hand. And these suits have been brought by persons living in localities where there are exemption laws that Kentucky did not recognize. In these outside states dealers knowing that they could bring suit in Kentucky without notice to the defendant, and knowing how much a wage earner makes a month, would encourage him to buy luxuries and necessities from them to the extent of his salary. Then before the time for the paying of the salary came, the man's account would be sent to Kentucky and notice of garnishment served on the agent or representative of the company without notice to the defendant. Where process could not be served it would require a warrant order to be issued in addition to other costs which frequently forced up to more than the amount of the claim.

Mr. Newman states that his bill is not intended to serve men who will not pay their debts. It is meant as a safeguard for our courts to keep them from being burdened with useless lawsuits outside of our state. Also, it will save big corporations from hundreds of troublesome, useless little process servings and other minor troubles incident to garnishment notices.

The bill has no effect whatever on salaries earned or payable in Kentucky, and any merchant in this state can garnishee wages of any person in this state or adjoining states, where service can be had within the state.

LIBRARY QUESTION

It Is Claimed that Project Will Go Into the Hands of School Board

This Will Completely Change Things, and Oust the Trustees Appointed.

THE SECOND CLASS LAW IS DIFFERENT

Paducah seems to be destined to be one of trouble over the public library that is to be built here by virtue of Mr. Andrew Carnegie's gift of \$35,000. First the council that asked in its charter in December took a fall out of the question, and selected an architect to draw the plans. Before any definite arrangements could be made with him the council passed out of existence, and the new council was inaugurated into office.

Nothing was done for a few weeks, and then Mayor Yeiser appointed a board of five trustees, which was perfectly legal under the third class charter. Those trustees selected a different architect from the council, and have made a contract with him.

When Paducah goes into the second class, however, which will be in a few days, it not sooner, and before anything can be done towards starting the library, there will be entirely different laws governing public library.

Instead of the library being in the hands of a board of trustees, it will be in the hands of the board of education, which will have sole and exclusive charge and control of it, and which will oust the present board of trustees.

Former Mayor Lang, who is now one of the library trustees, and is the best authority in the city on the second class charter, stated this morning that he had carefully examined the law, and found that under all laws passed up to the meeting of the recent legislature, the library goes into the hands of the school board the moment Paducah becomes a city of the second class. The statutes are plain and unequivocal, and unless there has been some law passed at the session closed repelling the provision, other law the recently appointed trustees will have to retire.

The only law passed by the legislature regarding libraries, Mayor Lang has been able to find a special bill to accept \$50,000 from our city. It does not repeal any portion of the law placing the library in the school board.

Steps will be taken at once to see that the provisions of the new law, when it is signed and becomes effective, and if it does not change the old law, the board of education, according to the members, will take charge of the library project at once, and manage the library matter to suit themselves.
